

## Clevershare Wireless Device

Wirelessly transmits Video, Audio and Touch

With the Clevershare wireless device you can control your Clevertouch from anywhere in the room, without the need for any wires. Simply plug the Clevershare into your laptop's USB port and you can show and edit your laptop's content on your Clevertouch screen. You can instantly display your desktop and control from your computer or Clevertouch – your pen or finger becomes your mouse.

### Product Features

- Simple operation, one button projection
- Up to eight computers can be connected at the same time
- The USB data interface applies to all computers
- Windows and Mac OS compatible
- Low power consumption, no additional power supply
- Exclusive to Plus Series and Pro Series

### Security Features

- Clevershare uses a "private" SSID that is only accessible between the receiver (Clevertouch IFP) and transmitter (dongle), this connection is setup when the dongle is paired with the Clevertouch
- The SSID uses the WPA2 encryption (based on 128bit AES) on the transport layer, but no data encryption on the application layer
- Since the video transfer is not on a public network, no other clients are allowed to join in
- The video transfer should be regarded as secure
