

High Bright in Window displays

Your [shop window](#) is the first opportunity that you have to engage a potential shopper and entice them into your store. High bright in window digital signage provides the perfect platform for you to engage their interest in the latest offers, a new clothing collection or allow them to take control of the display and view your products when your store is closed.

PoS - Point of Sale

Use small screen digital signage at till points as a last chance to engage with your customers and entice them to pick up that last item, come back soon for further offers, or visit online to view additional products and services.

Retail Assistant

Placing digital signage displays among your products will assist customers to choose which product they might wish to purchase. Have the ability to influence shopper decisions through digital signage, whether they are at point of sale or scattered across the store. Employing this [feature](#) can also help with busy stores where human retail assistants are at a premium, but ensures no information is lost in translation.

NFC & Beacons

Digital signage is a great way to schedule and display the latest product information to your customers, but what if they want more? Using the latest in Beacon and NFC mobile technology, customers can take control of the displays and use their [mobile devices](#) to control the content on the display to view additional information regarding the products they are interested in.
